BEFORE WE START

What This Unit Is About

Read this page with your teacher

AT THE END OF THIS UNIT YOU WILL BE ABLE TO

- [ ] Explain word processing and the facilities of a word processor.
- [ ] Compare commercial, FOSS and cloud-based word processing software.
- [ ] Name the parts of the MS Word and LibreOffice Writer windows.
- [ ] Create, save, open and close documents, and add a password.
- [ ] Set up the page, select text, and format text and paragraphs.
- [ ] Add pictures, symbols, headers, footers, columns and tables.
- [ ] Proofread and print a document, use mail merge and shortcut keys.

THREE RULES FOR THE COMPUTER ROOM

- **Always** save your work in your own folder, with a clear file name.
- **Never** open, change or delete a file that belongs to someone else.
- **Always** ask your teacher before you print. Save a PDF file when you can.

HOW TO USE THIS BOOK

Each chapter has three parts. First you **read** the chapter with your teacher. Then you **do** the practical on a computer with MS Word or LibreOffice Writer. Last you **write** the exercises in this book.

You will need: a pencil, an eraser, a ruler, your textbook (pages 158 - 193) and a computer with MS Word or LibreOffice Writer.

THE WORDS YOU WILL LEARN

Word processing	FOSS	Cloud computing	Title Bar
Ribbon	Status Bar	Dialogue box	Menu Bar
File extension	Save As	Password	Page Setup
Orientation	Margin	Alignment	Indentation
Multilevel list	Header / Footer	Columns	Merge cells
Thesaurus	Find and Replace	Mail Merge	Shortcut keys

"A good document is like a good student: neat, clear and well prepared."

- THE KING OF ICT

CHAPTER 1

Word Processing Software

? THE ART FESTIVAL

"We must make invitations, letters and certificates for the Art Festival. By hand, or with the old typewriter?"

Neither! **Word processing software** gives attractive letters, pictures and borders, and saves, corrects and prints every document.

6.1 What is word processing?

Preparing everyday documents - letters, reports, invitations, certificates - in different styles is called **word processing**. Hand-written documents are hard to keep neat, and a manual **typewriter** cannot format, save, or print in the sizes we need. The computer is the best machine for this work.

i A WORD PROCESSOR GIVES US THESE FACILITIES

- Creation and editing
- Saving and retrieving
- Spell checking and grammar
- Mail merge
- Inserting objects such as images
- Print preview and printing
- Find and replace

6.2 Word processing software

Some must be **purchased**; some are **Free and Open Source Software (FOSS)**. Smart phones and tablets have them too: Documents To Go, Google Docs, Kingsoft Office and Polaris Office.

Name of the software	Producer
AbiWord	SourceGear Corporation
FrameMaker	Adobe Systems Incorporated
iWork Pages	Apple
Kingsoft Office Writer	Kingsoft
LibreOffice Writer	The Document Foundation (FOSS)
Microsoft Office Word	Microsoft Corporation
OpenOffice Writer	Apache Software Foundation (FOSS)
WordPerfect	Corel

i CLOUD COMPUTING

No word processing software on the computer? Use the Internet, for example **Google Docs**.

- You do not have to install word processing software on the computer.
- You do not need space on the hard disk for the software.
- The Internet itself gives space to save the document.
- You can open or edit the document from any computer that has the Internet.

6.3 The Microsoft Word window

Open MS Word 2019 with **Start → All Programs → Microsoft Office → Microsoft Office Word 2019** (this may be different in your operating system).

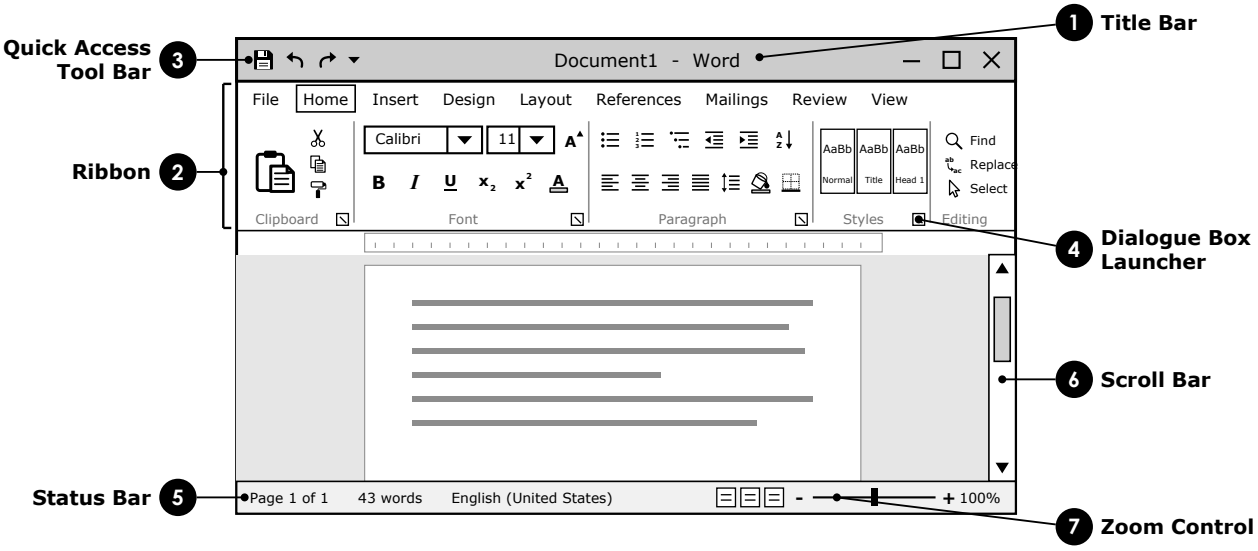

Figure 6.1 - the Microsoft Word 2019 window

	Part	What it is and what it does
1	**Title Bar**	The top bar: the document name (**Document1** ...) and the window buttons.
2	**Ribbon**	Tabs (File, Home, Insert ...) with the tools as icons, in groups.
3	**Quick Access Tool Bar**	Save, Undo, Redo ... above the Ribbon (it can move below it).
4	**Dialogue Box Launcher**	The small arrow beside a group name: it opens a dialogue box.
5	**Status Bar**	The number of pages and words, the language, the view buttons.
6	**Scroll Bar**	Moves up and down the document.
7	**Zoom Control**	Changes the size on the screen only, not the document itself.

6.4 The Home ribbon

The **Home** tab has the tools we use most. Each group has a **Dialogue Box Launcher** at its bottom right. Rest the mouse pointer on a tool to see its **Tool Tip** (its name).

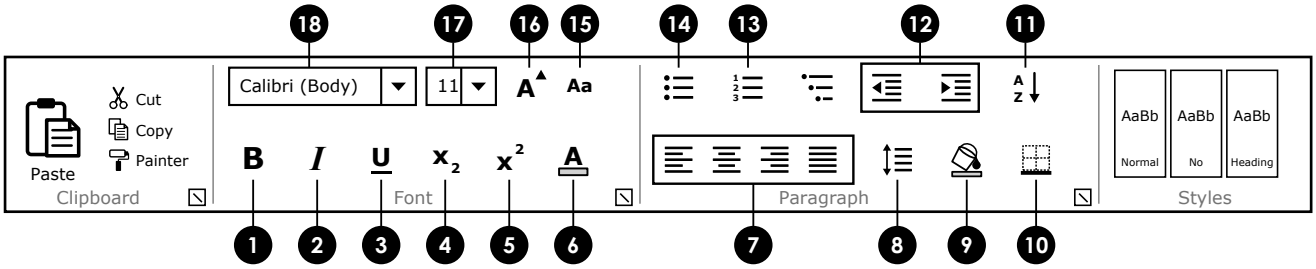

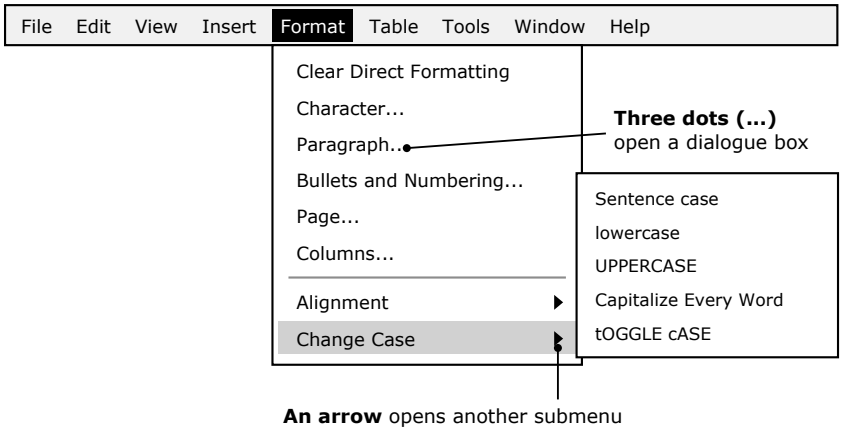

Figure 6.3 - some features of the Home ribbon

1 Bold **2** Italic **3** Underline **4** Subscript **5** Superscript **6** Font colour
7 Alignments **8** Line spacing **9** Shading **10** Border **11** Sort **12** Indentation
13 Numbering **14** Bullets **15** Change case **16** Grow font **17** Font size **18** Font name

> "A typewriter waits for perfect work. A word processor helps you to make it."
>
> - THE KING OF ICT

6.5 The LibreOffice Writer window

Open it with **Start → All Programs → LibreOffice Writer**.

- The **Title Bar** shows the name of the document. A new one is **Untitled 1**, **Untitled 2** ...
- The **Menu Bar**: File, Edit, View, Insert, Format, Table, Tools, Window and Help. Each menu opens a submenu.
- In a submenu, three dots (...) open a dialogue box and an arrow opens another submenu.

Figure 6.11 - the Format menu and a submenu

Under the Menu Bar: the **Standard Tool Bar** (New, Open, Save, Print, Page Preview, Cut, Copy, Paste, Undo, Redo, Table, Spelling and Grammar, Gallery, Help) and the **Formatting Tool Bar**. Show or hide them with **View → Toolbars**.

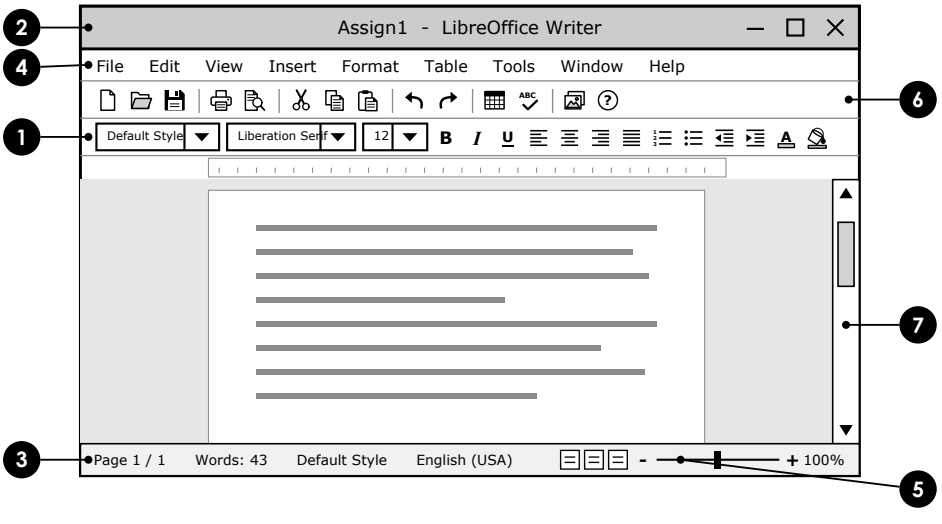

DO IT - PRACTICAL 1 (TEXTBOOK PAGES 161 - 166)

1	Open MS Word. Find the seven parts of Figure 6.1.
2	Rest the pointer on five tools and read their **Tool Tips**. Open the Font dialogue box.
3	Drag the Zoom slider. Does the document change, or only the screen?
4	Open LibreOffice Writer. Find a menu command with three dots, and one with an arrow.
5	Click **View → Toolbars**. Hide one tool bar, then show it again.

A Label the Writer window

8 marks

This is LibreOffice Writer (Figure 6.8). Write the name of each part.

1. .....
2. .....
3. .....
4. .....
5. .....
6. .....
7. .....
8. What does the Title Bar show for a new Writer document?

.....

B Word, Writer or both?

8 marks

Tick one box for each sentence.

It is true for ...	MS Word	LibreOffice Writer	Both
A new document is shown as Document1.	☐	☐	☐
A new document is shown as Untitled 1.	☐	☐	☐
It has a Menu Bar: File, Edit, View, Insert, Format ...	☐	☐	☐
Its tools are icons on a Ribbon, in tabs and groups.	☐	☐	☐
It has a Standard and a Formatting Tool Bar.	☐	☐	☐
The Status Bar shows the number of words.	☐	☐	☐
A Dialogue Box Launcher opens a dialogue box.	☐	☐	☐
Zoom changes the size on the screen only.	☐	☐	☐

C Who makes it?

6 marks

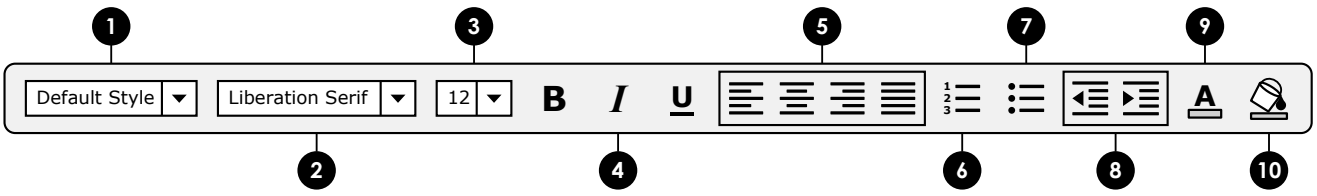

Textbook page 160. Write the correct letter in the box.

A - Software		B - Producer
1. AbiWord		**A.** Corel
2. FrameMaker		**B.** Apple
3. iWork Pages		**C.** Microsoft Corporation
4. Microsoft Office Word		**D.** SourceGear Corporation
5. OpenOffice Writer		**E.** Apache Software Foundation
6. WordPerfect		**F.** Adobe Systems Incorporated

D The Formatting Tool Bar

10 marks

LibreOffice Writer (Figure 6.13). Write the name of each numbered tool.

1. ..... 2. .....

3. ..... 4. .....

5. ..... 6. .....

7. ..... 8. .....

9. ..... 10. .....

E Choose the correct answer

5 marks

Underline your answer.

1. Which of these is NOT word processing software?
   (a) AbiWord (b) WordPerfect (c) iWork Pages (d) Kaspersky
2. Who produces WordPerfect?
   (a) Apple (b) Corel (c) Adobe (d) Microsoft
3. Which is an example of cloud computing for word processing?
   (a) Google Docs (b) AbiWord (c) FrameMaker (d) WordPerfect
4. The top-most bar of the MS Word window is the
   (a) Ribbon (b) Status Bar (c) Title Bar (d) Menu Bar
5. In a LibreOffice Writer menu, a command that ends with three dots (...)
   (a) opens another submenu (b) opens a dialogue box
   (c) closes the menu (d) prints the page

CHAPTER 2

Preparing a Document

? SAVED ... BUT WHERE?

"I typed my letter for an hour. Now I cannot find it!" "Did you save it with a proper name?"

Learn to save, open and protect a document and to set up the page. Then format the text, the paragraphs and the lists.

6.6 New, Save, Save As, Close and Open

Step	Do this (MS Word and LibreOffice Writer)	Why?
1 Open a new page	MS Word: **File** → **New** → **Blank document**. Writer: **File** → **New** → **Text Document**. Both: **Ctrl + N**.	Another document needs a new page.
2 Save	**File** → **Save** (**Ctrl + S**). Choose a place in **Save in**, type a name in **File name**, click **Save**.	A proper place and name make it easy to find.
3 Save As	**File** → **Save As**. Choose a place, type a new name, click **Save**.	A second file. The old file stays.
4 Close	**File** → **Close**.	Unwanted open files disturb the computer.
5 Open	**File** → **Open** (**Ctrl + O**). Find the place in **Look in**, select the file, click **Open**.	To use a saved file again.

A saved document is called a **file**. Every file is saved with a **file extension**, so it is easy to find again. After **Save As** with a new name there are two files: the old one and the new one.

Software	Extension
MS Word 2007 / 2010	**.docx**
MS Word 97 - 2003	**.doc**
LibreOffice Writer	**.odt**

6.7 Saving a document with a password

A password gives **security**: other people cannot open the document.

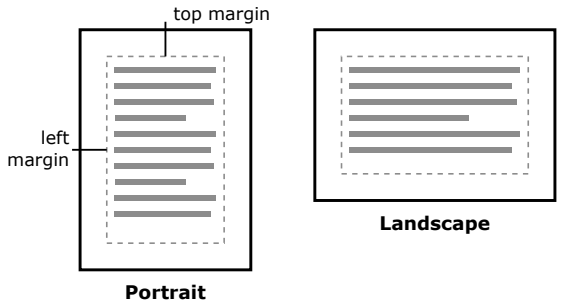

FOR MICROSOFT WORD

1. **File** → **Save**. Choose a place and type a name.
2. Select **Tools**, then **General Options**.
3. Type a password in **Password to open**. Click **OK**.
4. Type it again in **Re-enter password to open**. Click **Save**.

FOR LIBREOFFICE WRITER

1. **File** → **Save**. Choose a place and type a name.
2. Tick **Save with password**. Click **Save**.
3. Type the password in the **Set Password** dialogue box.
4. Type it again in the second box. Click **OK**.

6.8 Page setup

Page setup is the **first step** in preparing a document.

- MS Word: **Page Layout** → **Page Setup**.
- LibreOffice Writer: **Format** → **Page** (the Page dialogue box).
- **Paper size**: international sizes such as A4, A5, B4 and Letter. You can change them.
- **Orientation**: **portrait** (tall) or **landscape** (wide).
- **Margins**: the space between the text and the edges of the paper.

6.9 Formatting and selecting

Formatting can be done before or after typing. It makes the document clear and attractive. Before you change letters, words, shapes, pictures or tables, you must **select** them.

To select ...	Do this
A letter or letters	Drag the mouse across the letter(s).
A word	Double-click the word.
A few words	Click the first word and drag to the last word.
A sentence	Click the first word of the sentence and drag to the last word.
A row (line)	Move the pointer to the left margin until it is a **white right arrow**. Click once.
A paragraph	Click **three times** on the paragraph (or drag from its first word to its last word).
A document	Press **Ctrl + A** (or click three times with the white right arrow).

6.10 Text formatting

You can change ...	Example
Font size	small and big letters
Font style	**Bold** or *Italic*
Underline	underlined letters
Font (type of letters)	Times New Roman, Comic Sans; fonts for Sinhala and Tamil too
Font colour	grey letters (any colour)

MS Word: select the letters, then click the tools in **Home** → **Font** or open the **Font** dialogue box.

LibreOffice Writer: select the letters, then use the **Formatting Tool Bar** or **Format** → **Character**.

You can use several tools at the same time.

6.11 Alignment

Alignment decides where the lines of a paragraph sit between the two margins (Figure 6.15).

Left Align	Center Align	Right Align	Justify
Lines start at the left margin.	Lines are in the middle.	Lines end at the right margin.	Lines touch both margins.

6.12 Indentation and spacing

Indentation moves a paragraph, or a part of it, in from the margin (Figures 6.16, 6.17).

Left Indentation	Right Indentation	First Line Indentation	Hanging Indentation
The paragraph moves in from the left margin.	The paragraph moves in from the right margin.	Only the first line moves in.	All lines but the first move in.

Line spacing is the space between the lines; **paragraph spacing** is the space between the paragraphs. **MS Word:** select the paragraphs and use **Home** → **Paragraph** or the **Paragraph** dialogue box. **Writer:** the Formatting Tool Bar or **Format** → **Paragraph**. Click **OK**.

6.13 Bullets, numbering and multilevel lists

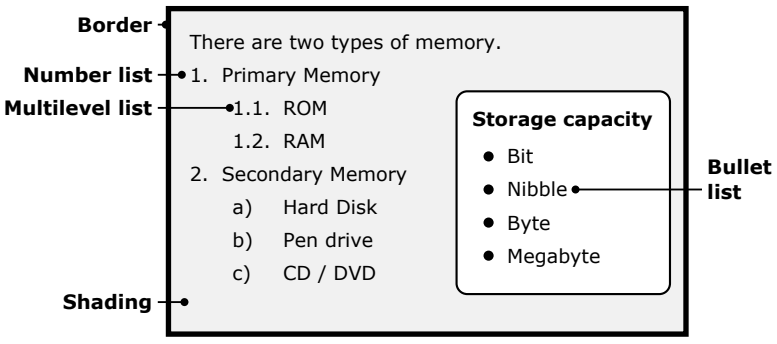

Figure 6.18 - bullets and numbering

- A **bullet list** starts each item with a dot or a small picture; a **number list** with a number.
- A **multilevel list** has items under items: 1., 1.1., a) ...
- **Tab** moves an item one level in. **Shift + Tab** brings it back to the main list.
- MS Word: the Paragraph group. Writer: **Format** → **Bullets and Numbering**.

6.14 Shading, background colours and borders

FOR MICROSOFT WORD

Select the paragraph or the document. Choose **Page Layout** → **Page Borders** (Page Background group). In the **Borders and Shading** dialogue box use the **Borders**, **Page Border** or **Shading** tab. Click **OK**.

FOR LIBREOFFICE WRITER

For ...	LibreOffice Writer
Paragraph colour	Format → Character → Background
Paragraph border	Format → Paragraph → Border
Page colour	Format → Page → Background
Page border	Format → Page → Border

Choose the colour or the border. Click **OK**.

DO IT - PRACTICAL 2 (TEXTBOOK ACTIVITIES 1 - 3, PAGES 169 - 172)

1	Activity 1: type **Word Processor**. Save it as **Assign1**, then Save As **Assign2**.
2	New page. Page Setup: **A4**, **Landscape**, margins 2" left and right, 1.5" top and bottom.
3	Activity 2: type **What is a computer?** Save it as **Assign2** (replace the old one).
4	Format it like Activity 3. Save it as **Assign3**. Save a copy with a password too.

DO IT - PRACTICAL 3 (TEXTBOOK ACTIVITIES 4 - 6, PAGES 174 - 176)

1	Open **Assign3**. Center, justify, first line indentation (Activity 4). Save as **Assign4**.
2	Open Assign3 again. Hanging indentation, line spacing (Activity 5). Save as **Assign5**.
3	New page: the list of Activity 6, examples one level in (**Tab**). Save as **Assign6**.
4	Add a page border. Save it as **Assign7**, Save as type **Word 97 - 2003**.

A Save it with a password

8 marks

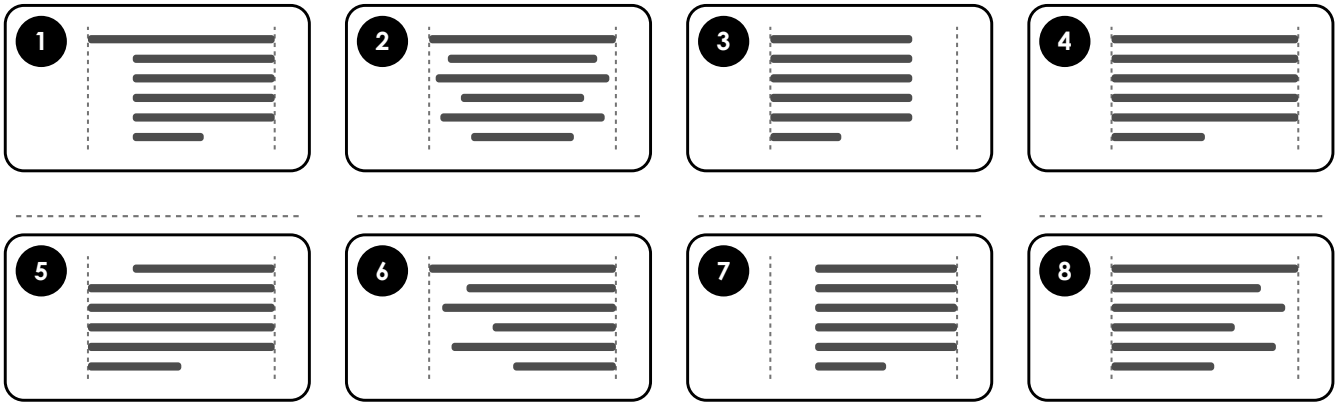

MS Word, textbook page 168. Number the steps 1 to 8 in the right order.

1. ☐ Select **Tools**.
2. ☐ Click **Save**.
3. ☐ Select **File** → **Save**.
4. ☐ Type the same password in **Re-enter password to open**.
5. ☐ Select **General Options**.
6. ☐ Type a suitable name for the document.
7. ☐ Type a password in **Password to open**. Click **OK**.
8. ☐ Select a suitable saving location from **Save in**.

B Name the paragraph format

8 marks

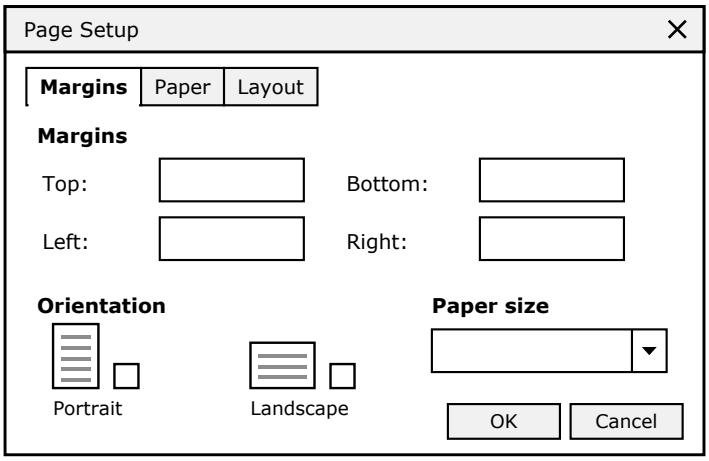

Each picture shows an alignment or an indentation. The dotted lines are the margins.

C Set up the page

8 marks

Use what you learnt in 6.8.

Activity 2 (page 171) needs **A4** paper in **landscape**, margins of **2"** on the left and the right and **1.5"** at the top and the bottom.

1. Fill in the Page Setup dialogue box. (6 marks)
2. A4 paper is 8.27 in x 11.69 in. In landscape, how wide is the space for the text? Show your working. (2 marks)

.....

.....

D Name the formatting

6 marks

Write the text formatting used in each numbered part.

Come to the Art Festival of our school!

See the paintings of Grade 10

on **Friday** at 9.00 am

in the *main hall*.

1. .....
2. .....
3. .....
4. .....
5. .....
6. .....

E Which kind of list?

6 marks

Tick the best list for each one.

The list	Bullet list	Number list	Multilevel list
The steps to save a document with a password	☐	☐	☐
Things to bring: paints, brushes, paper	☐	☐	☐
Types of software, with examples under each	☐	☐	☐
The order of the events at the prize-giving	☐	☐	☐
Storage units: bit, nibble, byte, megabyte	☐	☐	☐
Types of memory, with their kinds under each	☐	☐	☐

"Save early, save often. A lost file is a lost hour."

- THE KING OF ICT

CHAPTER 3

Formatting the Document

THE SCHOOL NEWSLETTER

"Our ICT club newsletter needs a title, a picture, two columns and a page number on every page."

There is a tool for each of these: shapes, pictures, symbols, tables, headers and footers, page numbers, columns and WordArt.

6.15 Tools for a clear, attractive document

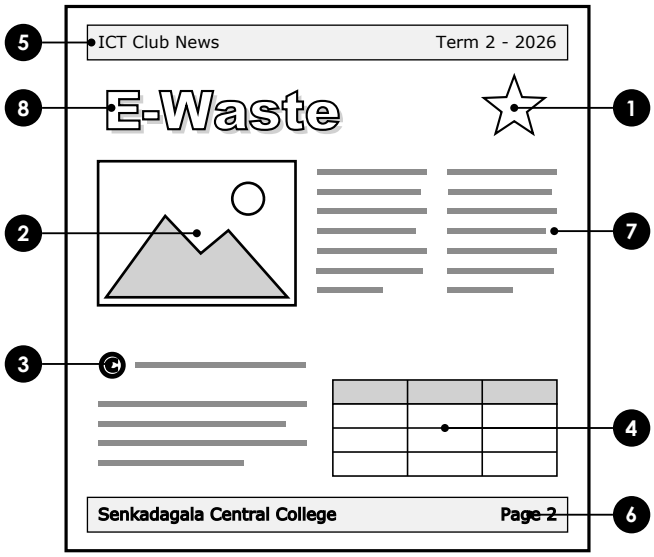

Figure 6.19 - a page made with these tools

These tools make a document clear and attractive (Figure 6.19). You can use other suitable tools as well.

1. **Shapes / Objects**
2. **Pictures / Images / ClipArt**
3. **Symbols**
4. **Tables**
5. **Header and Footer**
6. **Page Numbers**
7. **Columns**
8. **WordArt / Fontwork**

6.16 Shapes and pictures

Put the cursor where you want the shape or the picture.

MS WORD: INSERT TAB

- Shape: **Insert** → **Shapes**, click a shape, drag it on the page.
- Picture: **Insert** → **Picture** (or Clip Art).

LIBREOFFICE: INSERT MENU

- Shape: **Insert** → **Object** → **OLE Object**, or the Drawing tool bar.
- Picture: **Insert** → **Picture** → **From File**.

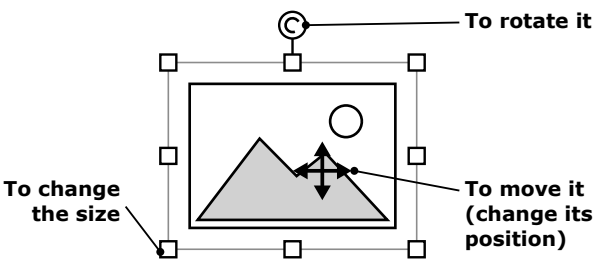

Figure 6.20 - a selected picture

Format a shape or a picture: click it to select it, then change its size, colour, border or position.

- MS Word: the **Picture Tools - Format** tab.
- LibreOffice Writer: the **Graphics** tool bar.

6.17 Symbols, headers, footers and page numbers

SYMBOLS

The keyboard has only a few symbols. Many more are available:

© ® ° ± ½ € Ω ™ § √ π

MS Word: **Insert** → **Symbol**, choose the symbol and click **Insert**.

Writer: **Insert** → **Special Character**, choose the symbol and click **OK**.

HEADER, FOOTER AND PAGE NUMBERS

A **header** is printed at the top of every page and a **footer** at the bottom. Page numbers are added to them too.

Use **Insert** → **Header and Footer** and **Page Numbers**. In MS Word the **Header & Footer Tools** tab opens.

6.18 Columns

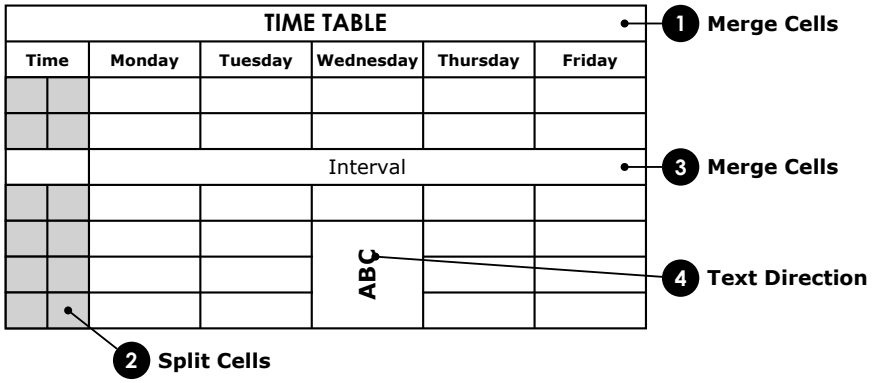

1 column 2 columns 3 columns

Newspapers and magazines use **columns**. Columns can be made before or after typing. Select the paragraphs first.

- MS Word: **Page Layout** → **Columns**, then choose the number of columns.
- LibreOffice Writer: **Format** → **Columns**, then choose the number of columns.

6.19 Tables

Word processing software lets us put data in a **table** of rows and columns. We can:

- Insert or draw the rows and columns you need.
- Delete rows or columns you do not need.
- Merge cells: join cells into one cell.
- Split cells: divide one cell into more cells.
- Colour the table.
- Change the text direction.

merged cells, split cells and text direction (page 181)

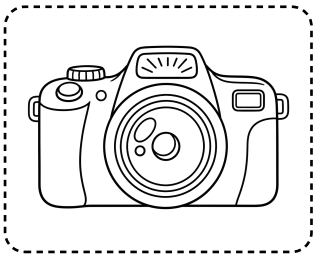

MS Word: Insert → **Table**. Choose the rows and columns (or type them in **Insert Table**). Click **OK**. Format it with the **Design** and **Layout** ribbons of **Table Tools** (Layout: **Merge Cells**).

LibreOffice Writer: Table → **Insert** → **Table**. Type the rows and columns. Click **Insert**. The **Table** menu has Delete, Select, Insert, Split and Merge, and **Table** → **Table Properties**.

Move from cell to cell with the **arrow keys**, the **Tab** key or a mouse click.

"Pictures, tables and columns turn plain words into a page people want to read."

- THE KING OF ICT

Colour me!

DO IT - PRACTICAL 4 (TEXTBOOK ACTIVITIES 7 AND 8, PAGES 180 - 183)

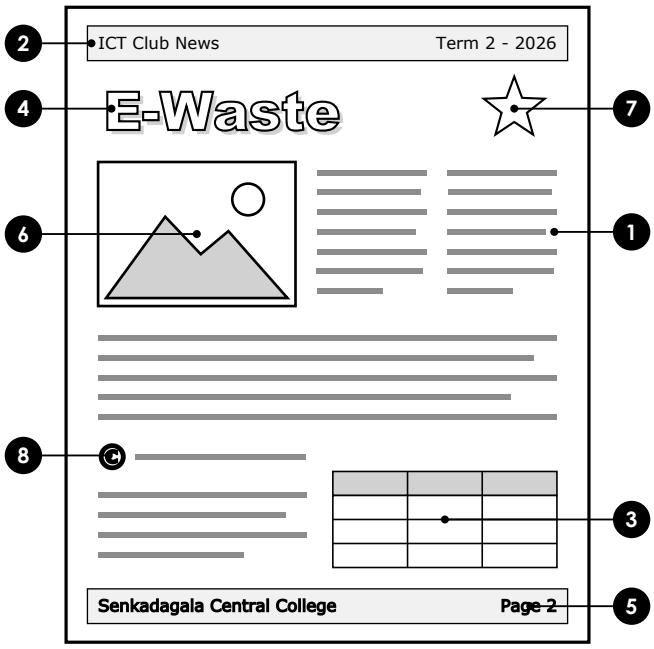

A newsletter page and a time table. **Ask your teacher first.**

1	Type the e-waste text of Activity 7. Add the title with **WordArt** (Fontwork) and an e-waste picture.
2	Put the first paragraphs in **two columns**. Make the examples a list with a **symbol** as the bullet.
3	Add a header, a footer with a page number and a page border. Save as **Assign10**, password **WordPass**.
4	New page: **Class Time Table - Grade 10** (Activity 8). Insert a table of **6 columns** and **10 rows**.
5	Fill it in (move with Tab). Merge the interval row, split some cells, colour some rows. Save as **Assign11**.

A Label the newsletter

8 marks

Write the tool used for each numbered part.

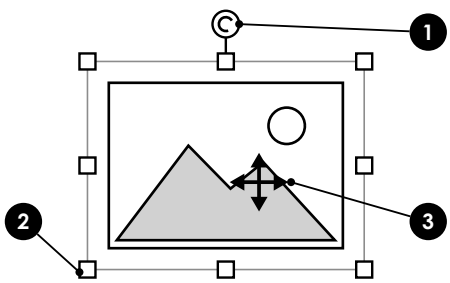

1. .....
2. .....
3. .....
4. .....
5. .....
6. .....
7. .....
8. .....

B Picture handles

4 marks

What does each numbered handle do? Answer question 4 too.

1. .....
2. .....
3. .....
4. In MS Word, which tab opens when you click a picture?

.....

C Which tool would you use?

8 marks

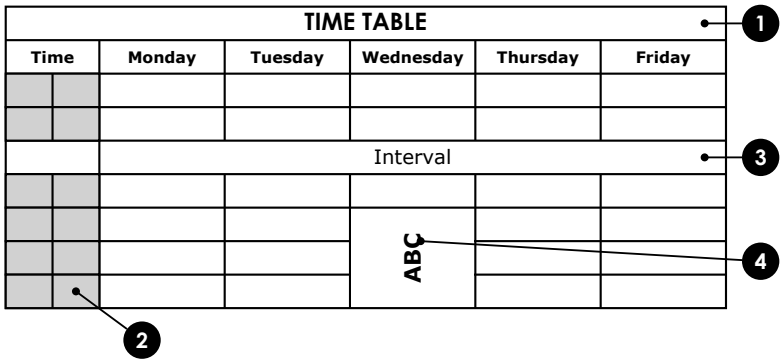

Write the name of the tool.

You want to ...	Tool
Show the name of the school at the top of every page.	
Show Page 1, Page 2 ... at the bottom of the pages.	
Add the sign © or Ω that is not on the keyboard.	
Make an article look like a newspaper page.	
Make a fancy, decorated title for a poster.	
Show the marks of five students in rows and columns.	
Join three cells of a table into one cell.	
Write ABC from the bottom to the top in a cell.	

D The time table

8 marks

Write what was done at 1, 2, 3 and 4. Then answer 5 to 8.

1. .....
2. .....
3. .....
4. .....

5. Kasun inserts the class time table with 6 columns and 10 rows. How many cells does it have?

   .....

6. He merges the 6 cells of the interval row into one cell. How many cells are there now?

   .....

7. Which key moves the cursor to the next cell?

   .....

8. In MS Word, which ribbon of Table Tools has Merge Cells?

   .....

E True or false

6 marks

Write T or F in the box.

1. ☐ Shapes and images make a document clear and attractive.

2. ☐ A header is printed at the bottom of every page.

3. ☐ Columns can be made before or after typing.

4. ☐ The keyboard has every symbol that we may need.

5. ☐ Split cells joins two cells into one cell.

6. ☐ You can use the Tab key to move from cell to cell in a table.

CHAPTER 4

Proofreading, Printing and Mail Merge

? ONE LETTER, ONE HUNDRED PARENTS

"A letter for every parent, each with their own name? A hundred letters?"

No! Type it once and use **mail merge**. But first **proofread** it, and check it with **Print Preview**.

6.20 Correcting spelling and grammar

! HOW ERRORS ARE SHOWN

Our scool is near the lake.

A **red** wavy line: a **spelling** error.

The students is happy.

A **green** wavy line: a **grammar** error.

Errors are shown **automatically**, with the possible correct words.

1. Put the cursor at the beginning of the document. MS Word: **Review** → **Spelling and Grammar**. Writer: **Tools** → **Spelling and Grammar**.
2. Select the correct word and click **Change**. Click **Ignore** for words that are not in the English dictionary: names of people, villages and countries.

6.21 Thesaurus, Find and Replace

Figure 6.22 - Find and Replace

- **Thesaurus** finds synonyms (words with the same meaning) of the selected word. MS Word: **Review** → **Thesaurus**. Writer: **Tools** → **Language** → **Thesaurus**.
- **Find**: put the cursor at the beginning. MS Word: **Home** → **Editing** → **Find**: type the word in **Search Document**. Writer: **Edit** → **Find**: type the word in the **Find** box, click **Find Next**.
- **Replace**: **Home** → **Editing** → **Replace** (Writer: the Edit menu). Fill in **Find what** (**Search for**) and **Replace with**; click **Replace** or **Replace All**.

6.22 Print Preview and Print

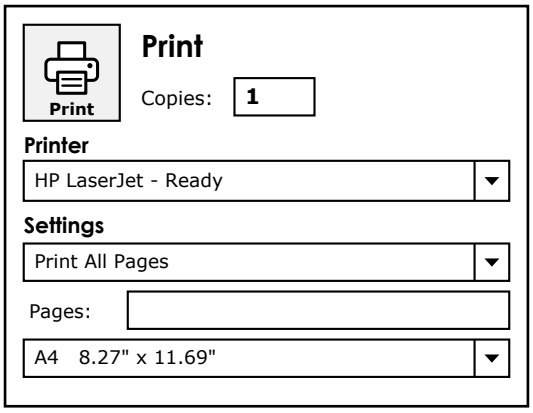

Figure 6.23 - Print in MS Word

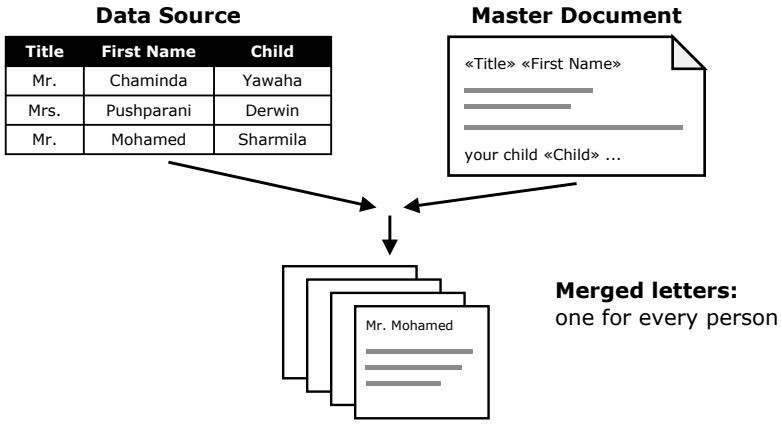

Print Preview checks the document (indentation, borders ...) before printing.

Print (**File** → **Print**): select the printer; print the current page, some pages or all pages; choose the number of copies.

! N.B. PDF INSTEAD OF PAPER

It is hard to print a copy for every student in the school laboratory. Save the document as a **PDF** file instead: in the Print dialogue box choose a PDF printer (or Microsoft XPS Document Writer), give a file name and click **Save**.

6.23 Mail merge

the mail merge process (page 188)

Mail merge sends invitations or letters, or prints certificates, address labels and post cards, for many people. Type the document first.

- The **data source** (address list) has the data of every person.
- The **master document** has the text and the **fields**, such as «First Name».
- Mail merge makes one document for every person.

FOR MICROSOFT WORD

1. **Mailings** → **Start Mail Merge** → **Letters**. **Select Recipients** → **Type New List**.
2. **Customize**: Add, Delete or Rename fields. Type the data with **New Entry**. Save the list.
3. **Address Block**, **Greeting Line** and **Insert Merge Field** put the fields in the letter.
4. **Finish & Merge** → **Edit Individual Documents**. Save and print.

FOR LIBREOFFICE WRITER

1. **Tools** → **Mail Merge Wizard**. Choose the document type: **Letter**.
2. Create the address list (Customize: Add, Delete, Rename) and type the data.
3. Add the address block and the salutation. Preview the letters.
4. **Save**, **Print** or **Send** (as e-mail) the merged document.

DO IT - PRACTICAL 5 (TEXTBOOK ACTIVITIES 9 AND 10, PAGES 185 - 192)

Proofreading and mail merge. LibreOffice: **Tools** → **Mail Merge Wizard**.

1	Type **Cloud Computing** (Activity 9). Save as **Assign12**. Misspell five words: Businasses, camputing, natwork, prommises, resourses.
2	Correct them with **Spelling and Grammar**. Find Webmail, information and storage.
3	Replace Business with **trade**, Expensive with **luxurious**, Connection with **relation**. Save as **Assign13**.
4	Type the letter of Activity 10 without the fields. Save as **Assign14**. **Mailings** → **Start Mail Merge** → **Letters**.
5	**Select Recipients** → **Type New List**: make the fields, type 10 people. **Insert Merge Field**, then **Finish & Merge**.
6	Page 192: make a certificate or an invitation for the Art Festival. Save it as a PDF file too.

"Read your work twice before you print it once."

- THE KING OF ICT

6.24 Shortcut keys

Shortcut keys save time. These are the shortcut keys of the textbook (page 192):

Shortcut key	Function	Shortcut key	Function
Ctrl + N	Get a new document	**Ctrl + X**	Cut letters / objects
Ctrl + S	Name the document and save it	**Ctrl + V**	Paste letters / objects
Ctrl + O	Open a document	**Ctrl + H**	Replace words
Ctrl + A	Select the whole document	**Ctrl + Home**	Cursor to the beginning of the document
Ctrl + C	Copy letters / objects	**Ctrl + End**	Cursor to the end of the document

A Be the proofreader

8 marks

Six words are underlined by the software. Fill in the table.

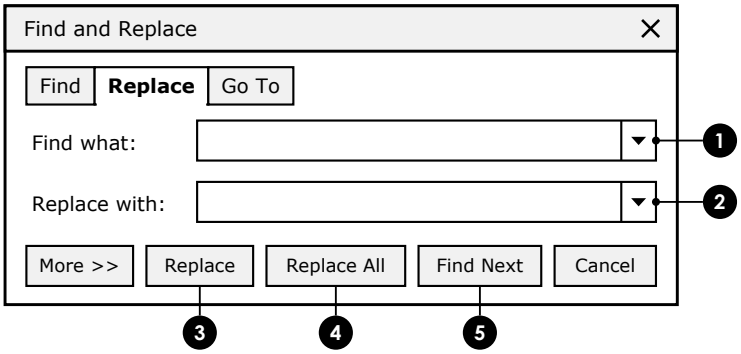

Our Art Festivel will be on Friday at Senkadagala Central College. Every students can bring paintings. The chief guest is Mrs Pushparani. She like art very much. It will be a great sucess.

No	Underlined word	Red or green?	Change or Ignore?	Correct word
1	**Festivel**			
2	**Senkadagala**			
3	**students**			
4	**Pushparani**			
5	**like**			
6	**sucess**			

B Find and Replace

6 marks

Look at the numbers in the dialogue box.

1. Activity 9: every **Business** must become **trade**. What do you type in box 1?

2. What do you type in box 2?

3. Which button changes every Business at once? Write its number.

4. Which button changes only the word that was found? Write its number.

5. Which shortcut key opens this dialogue box?

6. In LibreOffice Writer, what is box 1 called?

C Her merged letter

8 marks

Activity 10. What does the letter for record 2 show in place of each field?

the data source (3 of the 10 records)

Title	First Name	Last Name	Address 1	Address 2	Child Name	Date	Time

REVISION

Unit 6 in One Page

Read this the night before the test

Topic	The key facts
Word processing	Preparing documents in different styles. Better than hand-writing or a typewriter: it formats, saves, prints, inserts pictures, checks spelling, finds and replaces, merges mail.
Software	Purchased: MS Word, WordPerfect ... FOSS: LibreOffice Writer, OpenOffice Writer. Cloud: Google Docs (no installing; open it from any computer with the Internet).
MS Word window	Title Bar, Ribbon (tabs, groups), Quick Access Tool Bar, Dialogue Box Launcher, Status Bar, Scroll Bar, Zoom.
Writer window	Title Bar, Menu Bar, Standard and Formatting Tool Bars. "..." opens a dialogue box; an arrow opens a submenu.
Files	New (Ctrl + N), Save (Ctrl + S), Save As (a second file), Close, Open (Ctrl + O). .docx, .doc, .odt. A password gives security.
Page Setup	The first step: paper size (A4, A5, B4, Letter), orientation (portrait, landscape), margins.
Select, format	Word: double-click. Paragraph: three clicks. All: Ctrl + A. Font, size, bold, italic, underline, colour.
Paragraphs	Left, center, right, justify. Left, right, first line, hanging indentation. Line and paragraph spacing.
Lists, borders	Bullet, number, multilevel lists (Tab, Shift + Tab). Shading, background colour, borders.
The document	Shapes, pictures, symbols, tables (merge, split, text direction), header and footer, page numbers, columns, WordArt.
Proofreading	Red line: spelling. Green line: grammar. Change or Ignore. Thesaurus: synonyms. Find and Replace (Ctrl + H).
Printing	Print Preview first. Print: printer, pages, copies. Save a PDF instead of printing for all.
Mail merge	Data source + master document = a letter, a label or a certificate for every person.

TICK WHEN YOU CAN DO IT

- [ ] I can explain word processing and name commercial, FOSS and cloud software.
- [ ] I can name the parts of the MS Word and LibreOffice Writer windows.
- [ ] I can create, save, open and close a document, and add a password.
- [ ] I can set up the page and format text and paragraphs.
- [ ] I can make lists and add borders, shading, pictures, symbols and tables.
- [ ] I can add a header, a footer, page numbers and columns.
- [ ] I can proofread, print, use mail merge and use shortcut keys.

WORD POWER

Unit 6 Word List

Twenty-seven words you must know

Word	What it means
Word processing	Preparing documents in different styles with a computer.
FOSS	Free and Open Source Software, such as LibreOffice Writer.
Cloud computing	Using software and saving files on the Internet, such as Google Docs.
Title Bar	The top bar of a window. It shows the name of the document.
Ribbon	The MS Word strip of tabs (File, Home, Insert ...) with the tools as icons.
Quick Access Tool Bar	Quick commands (Save, Undo, Redo ...) above the Ribbon.
Dialogue box	A small window with more tools and settings, like the Font dialogue box.
Status Bar	The bottom bar: the number of pages and words, and the language.
Menu Bar	File, Edit, View, Insert, Format ... in LibreOffice Writer.
Tool Tip	The name of a tool, shown when the mouse pointer rests on it.
File extension	The end of a file name that shows its type: .docx, .doc or .odt.
Save As	Saves the document with another name or in another place.
Page Setup	The settings for the paper size, the orientation and the margins.
Orientation	Portrait (taller than wide) or landscape (wider than tall).
Margin	The empty space between the text and the edge of the paper.
Alignment	Where the lines sit: left, center, right or justify.
Indentation	Moving a paragraph, or its first line, in from the margin.
Multilevel list	A list with sub-items: 1., 1.1., a) ...
Header / Footer	Text at the top / at the bottom of every page.
Columns	Text in two or more narrow columns, like a newspaper.
Merge / Split cells	Join cells into one cell / divide one cell into more cells.
Thesaurus	A tool that finds synonyms (words with the same meaning).
Proofreading	Checking a document for spelling and grammar errors before printing.
Find and Replace	Finds a word and changes it to another word.
Print Preview	Shows how the pages will look before you print them.
Mail Merge	Joins a data source and a master document to make letters for many people.
Shortcut key	Keys that do a task quickly, such as Ctrl + S to save.

"Learn the words today, and the tools will be easy tomorrow."
