★ TEACHING TIPS

- Ask students to rest the mouse pointer on any tool: the Tool Tip tells its name. They can learn alone.
- Make one folder for each student (Grade 10 - Name) before the first practical. Files never get lost.
- Teach Ctrl + S on day one. Ask the class to press it after every few lines they type.
- Show Save As on the projector: open the folder and let the class see that the old file is still there.

TEXTBOOK SLIPS - WHAT THIS BOOK DOES

- Page 160 prints "Open Office Writer" as the producer of LibreOffice Writer. The workbook says The Document Foundation, and does not test it.
- Page 160 "Windows 365" means Microsoft's online Office (Office 365). The workbook uses Google Docs only.
- Page 187 "Microsoft XPC Document" is the Microsoft XPS Document Writer; the workbook teaches the PDF idea.
- Assign2 (pages 169 and 171) and Assign10 (pages 180 and 191) are used twice. The workbook replaces the first Assign2 and saves the mail merge letter as Assign14.
- Page 169 "Libre Office Clac" means Writer; page 179 "Formatting - Columns" means Format - Columns.

5. First Line Indentation	**6.** Right Align	**7.** Left Indentation	**8.** Left Align

1 mark each. Look at the dotted margins: an indentation moves the text in from a margin (the whole paragraph, only the first line, or all lines but the first); an alignment only places the lines between the margins.

C Set up the page

8 marks

Question 1 (6 marks): Top 1.5", Bottom 1.5", Left 2", Right 2", Landscape, A4 - 1 mark each.

Question 2 (2 marks): in landscape the long side (11.69 in) is the width, so the text is 11.69 - 2 - 2 = **7.69 in** wide (1 mark for the working, 1 mark for the answer). The height would be 8.27 - 3 = 5.27 in.

D Name the formatting

6 marks

1. A different font (font name)	**2.** Font size (bigger)	**3.** Font colour
4. Bold	**5.** Underline	**6.** Italic

Storage units: bit, nibble, byte, megabyte	☑	☐	☐
Types of memory, with their kinds under each	☐	☐	☑

1 mark for each row.

TEACHING TIPS

- For the password practical, give the whole class one simple password. Forgotten passwords lose files.
- Page setup first: let students set A4 and the margins before they type, as the textbook says.
- Practise selection as a game: call out "a word", "a sentence", "a paragraph", "the whole document".
- Teach alignment with the class seated: who sits on the left, in the middle, on the right, everywhere?

- Bring a real school newsletter or newspaper. Find the header, footer, columns, pictures and a table.

(a) Mail merge (1 mark). (b) The data source / address list (1 mark) and the master document - the letter (1 mark).

2. Give two advantages of cloud computing for preparing documents. (2 marks)

Any two: no software to install; no hard disk space needed; the Internet gives space to save; open or edit from any computer with the Internet. 1 mark each.

3. An A4 page (8.27 in x 11.69 in) is set to portrait with a 1 inch margin on every side. (a) How wide is the text area? (b) How tall is it? (c) Which orientation would make the page wider than it is tall? (3 marks)

(a) 8.27 - 2 = 6.27 in (1 mark). (b) 11.69 - 2 = 9.69 in (1 mark). (c) Landscape (1 mark).

4. What is the difference between Save and Save As? (2 marks)

Save keeps the document (in a place, with a name). Save As saves it with a new name or in a new place, so there are two files and the old one stays. 2 marks.

5. Write the shortcut key to (a) go to the end of the document, (b) replace words. (2 marks)

(a) Ctrl + End (1 mark). (b) Ctrl + H (1 mark).

(a) A spelling error - the word is not in the English dictionary (1 mark). (b) Ignore (1 mark).

WHAT STUDENTS USUALLY GET WRONG

- They think Save As deletes the old file. It makes a **second** file; the old one stays.
- They mix up Zoom and font size. Zoom changes only the screen, never the printed document.
- They mix up first line and hanging indentation: **first line** moves only line 1 in.
- They confuse the menus of the two programs: MS Word has tabs and ribbons, Writer has a Menu Bar.
- They click Change for every red word - names of people and places need **Ignore**.
- In landscape they subtract the margins from the wrong side: the long side (11.69 in) is the width.
- Mail merge: they think one letter is typed for each person. One master document + one data source.

HOMEWORK AND EXTRA PRACTICE

- Draw the MS Word window from memory and name its seven parts (Figure 6.1).
- Make a list of 10 icons from the Home ribbon with their names and what they do.
- Write the steps to save a document with a password, both in MS Word and in LibreOffice Writer.
- Fast learners: make the textbook activity on page 192 - a certificate, an invitation card and a banner - and save each one as a PDF file.

TIP: Picture handles: let students rotate, resize and move one picture before the newsletter practical.
