BEFORE WE START

What This Unit Is About

Read this page with your teacher

AT THE END OF THIS UNIT YOU WILL BE ABLE TO

- [ ] Explain what a presentation is and compare the three projectors.
- [ ] List the characteristics of a good quality presentation.
- [ ] Name open source and proprietary presentation software.
- [ ] Name the window parts of PowerPoint and Impress, and use the views.
- [ ] Set the slide size and layout; add a background, text and pictures.
- [ ] Add slide transitions, animations, sounds and videos.
- [ ] Save, open, show and print a presentation and its handouts.

THREE RULES FOR THE COMPUTER ROOM

- **Always** save your presentation with your name, and save it often.
- **Never** connect a pen drive or a projector without your teacher.
- **Always** check the spelling and grammar of your slides.

HOW TO USE THIS BOOK

Each chapter has three parts. First you **read** the chapter with your teacher. Then you **do** the practical task on a computer. Last you **write** the exercises in this book.

You will need: a pencil, your textbook (pages 245 - 268) and a computer with MS PowerPoint or LibreOffice Impress. A multimedia projector helps in Chapter 4.

THE WORDS YOU WILL LEARN

Presentation	Audience	Slide	Multimedia
Projector	Open source	Proprietary	Ribbon
Tabs	Slide Pane	Notes Pane	Status Bar
Slide Sorter	Slide Show	Layout	Theme
Place Holder	Text Box	Clip Art	Handles
Transition	Animation	Handout	Green computing

"A good presentation does not show everything. It shows the right things, clearly."

- THE KING OF ICT

CHAPTER 1

Presentations and Good Presentations

? A TALK FOR THE WHOLE SCHOOL

"I must talk about the dengue campaign at the assembly. 500 students will listen!"

"Use the multimedia projector and a few good slides."

A good presentation shares ideas with many people. In this chapter you compare the tools we use and learn what makes a presentation good.

8.1 What is a presentation?

A **presentation** is the act of explaining or showing information to an **audience** in an organised way. People make presentations to share their views, opinions, ideas and knowledge with a larger group of people.

A presenter uses **verbal** and **non-verbal** expressions, gestures and tools, such as projectors, to convince the audience.

8.2 Projectors and multimedia presentations

Presenters have used three types of projectors (textbook page 246). With the **multimedia projector** we can add multimedia contents - numbers, letters, images, animations, videos, tables, graphs and sounds. Such presentations are called **multimedia presentations**.

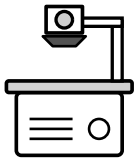

Figure 8.1.1 - OHP (Over Head Projector)

Figure 8.1.2 - Slide projector

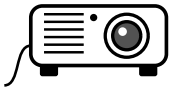

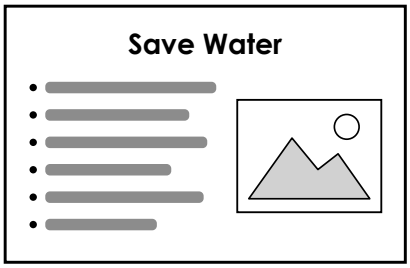

Figure 8.1.3 - Multimedia projector

Feature	OHP	Slide projector	Multimedia projector
Display and source	Writing or printed material on transparent sheets	Slides with images	Computer, flash memory or other devices
Quality of the display	Text and simple images are clear, but colours are limited	Clear and colourful photographs	High-resolution pictures, videos, animations and colourful texts
Content	Written or printed text, images, maps	Photographs or prepared slides	Static or dynamic contents (text, images, audio clips, video clips, presentations)
Compatibility	Low	Low	High
Modern usage	Very rare nowadays	Used in certain fields (history / art)	Very popular, used in most situations
Processing time	High - can be written at the moment; pre-prepared materials can also be used	High - extra work to prepare the visual frames	Low - can be completed within a short time

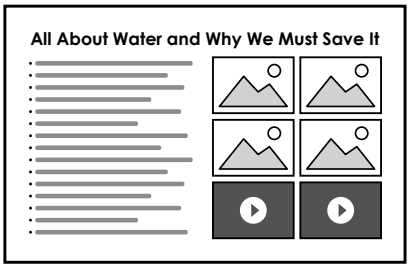

8.3 A good quality presentation

A presentation is a collection of several slides. A quality presentation delivers the intended message to the viewer effectively. Pay attention to these features (textbook pages 247 - 248):

Pay attention to ...	What to do
Number of lines	**6 - 9 lines** on a slide. More lines take more time to read, or the font becomes too small.
Font size	**32 points or more.** The distance between the screen and the audience decides the font size.
Grammar and language	Double check the grammar, the spelling and the language by reading the slides carefully.
Images, drawings, tables, graphs	**Not more than two** on a slide. Too many make it confusing.
Use of colours	Emphasise points with dark colours, bold letters or other fonts. No dark red on the whole slide: use red only for words that need attention. Mind the contrast of the background and foreground colours.
Animation and videos	**One** animation or video on a slide. More may overlap their sounds and confuse the viewer. Many transitions are a problem too.
Target group	Meet the objectives of the audience. An animation that takes their attention away can lose the whole objective.
Digital format and resolution	Make it ready for computers, tablets or projectors, with the right resolution.
Ease of sharing	Share it by email, cloud computing or learning management systems.

A good slide: a title, six lines and one picture

A poor slide: fifteen small lines, four pictures and two videos

DO IT - PRACTICAL 1 (TEXTBOOK ACTIVITY, PAGE 248)

Make a list of all the points which are important to make an effective presentation.

1	Your teacher shows two short presentations on the multimedia projector. Watch them from the back of the room.
2	Count the lines on a slide. Look at the font size, the pictures, the colours and the animations.
3	With a friend, make a list of all the points which are important to make an effective presentation.
4	Compare your list with the table in 8.3. Add the points you missed.

A Which projector?

8 marks

Tick the projector that each sentence is about.

It ...	OHP	Slide projector	Multimedia projector
It shows material on transparent sheets.	☐	☐	☐
It shows photographs or prepared slides.	☐	☐	☐
Its source is a computer or a flash memory.	☐	☐	☐
It shows videos, animations and colourful text.	☐	☐	☐
It is used only in fields like history and art.	☐	☐	☐
It is very rare nowadays.	☐	☐	☐
You can write on it as you present.	☐	☐	☐
It needs extra work to prepare visual frames.	☐	☐	☐

B True or false

6 marks

Write T (true) or F (false) in the box.

1. ☐ People make presentations to share their views, opinions, ideas and knowledge.
2. ☐ A multimedia projector has low compatibility.
3. ☐ The distance between the screen and the audience helps to decide the font size.
4. ☐ Dark red on the whole slide is comfortable for the viewers' eyes.
5. ☐ Red can be used for some words or numbers that need attention.
6. ☐ It is ideal to use three or four videos on each slide.

C Choose the correct answer

5 marks

Underline your answer.

1. Which projector uses transparent sheets?
   (a) OHP (b) Slide projector
   (c) Multimedia projector (d) Scanner

2. Which projector has the lowest processing time?
   (a) OHP (b) Slide projector
   (c) Multimedia projector (d) All the same

3. The font size on a slide should be at least
   (a) 12 points (b) 16 points (c) 24 points (d) 32 points

4. Too many videos on one slide confuse the viewer because
   (a) the sounds overlap (b) the file is small
   (c) it cannot print (d) it is too wide

5. Numbers, letters, images, animations, videos, tables, graphs and sounds make a
   (a) manual presentation (b) multimedia presentation
   (c) transparent sheet (d) printed handout

D Fill in the blanks

8 marks

Use the words in the box. Two words are extra.

WORD BANK

audience	non-verbal	flash	slides	6 - 9
32	two	cloud	three	12

1. A presentation shows information to an ..... in an organised way.
2. A presenter uses verbal and ..... expressions, and tools.
3. A multimedia projector shows a computer or a ..... memory.
4. A presentation is a collection of several ..... .
5. The best number of lines on a slide is ..... .
6. Keep the font size of a slide at ..... points or more.
7. Do not put more than ..... images or tables on one slide.
8. E-presentations can be shared by email or ..... computing.

E Spot the mistakes

6 marks

Kasun broke SIX rules of 8.3. Underline them. Write the correct rule for each.

For the Science Day, Kasun made a presentation about plants. Each slide has fifteen lines of text in a font size of 16 points. On every slide there are four pictures and three video clips that play together. The background of every slide is dark red, and he did not check the spelling.

1. ..... 2. .....

3. ..... 4. .....

5. ..... 6. .....

CHAPTER 2

Presentation Software

? NO MS OFFICE AT HOME?

"My computer has no MS Office. Can I still make slides?" "Yes! Use LibreOffice Impress, or make them on the web."

In this chapter you meet presentation software, the windows of MS PowerPoint and LibreOffice Impress, and the four views.

8.4 Presentation software

A software which helps to create presentations with multimedia contents is called **presentation software**. There are two categories: **free and open source** software and **proprietary** (commercial) software.

Without MS Office on your computer you can still make a presentation on the web, with **MS Office 365 PowerPoint**, **Google Presentation** or **Microsoft SkyDrive PowerPoint**, and save it in the cloud. AI tools such as **Gamma**, **Slides AI** and **Beautiful.ai** can also create presentations.

Software name	Developing organization	Open source / Proprietary
Apple Keynote	Apple Inc.	Proprietary
Corel Presentation	Corel Corporation	Proprietary
LibreOffice Impress	Document Foundation	Open source
Microsoft PowerPoint	Microsoft Corporation	Proprietary
OpenOffice.org Impress	Apache Corp.	Open source

8.5 The MS PowerPoint work space

Start MS PowerPoint: **Start** → **All Programs** → **Microsoft Office** → **Microsoft Office PowerPoint** (this may change with the operating system). Many of its tools are the same as in MS Word.

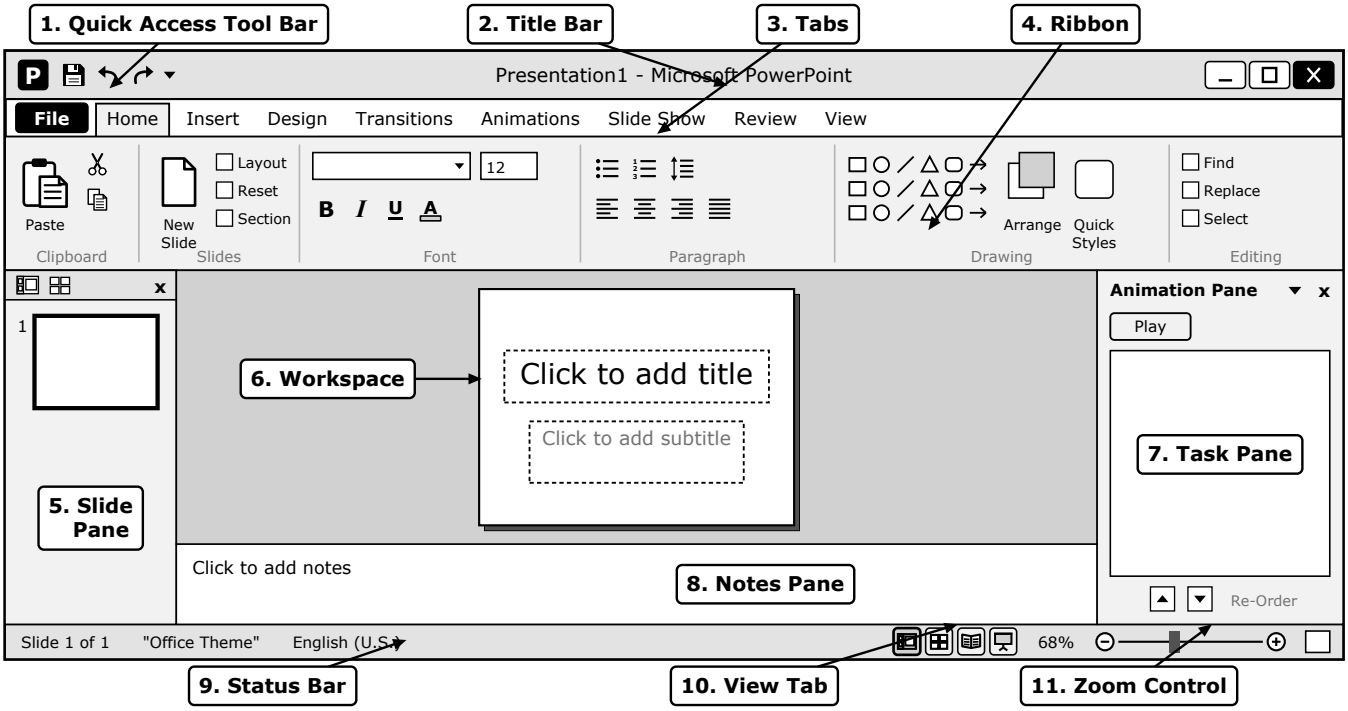

Figure 8.4.1 - the MS PowerPoint work space (PowerPoint 2010, as in the textbook)

> "Software is only a tool. The ideas come from you."
>
> - THE KING OF ICT

	Part	What it does
1	**Quick Access Tool Bar**	On the left of the title bar. Runs commands faster; add the commands you use often.
2	**Title Bar**	The name of the presentation and the software; Minimize, Maximize/Restore, Close.
3	**Tabs**	The menus of the Ribbon. A tab has groups: the Home tab has the Font group.
4	**Ribbon**	The tool bar of PowerPoint: icons grouped as categories.
5	**Slide Pane**	The slides in small size, on the left. Click one to show it large.
6	**Workspace**	The presentation is created here.
7	**Task Pane**	Helps to add features, for example animations.
8	**Notes Pane**	Notes about the slide. The audience does not see them in the show.
9	**Status Bar**	The total number of slides, the selected slide number and the language.
10	**View Tab**	The view buttons (bottom right). They change how a slide is shown.
11	**Zoom Control**	Zooms the slide in or out.

8.6 Four ways to view a presentation

The four buttons of the **View Tab** (bottom right, Figure 8.4.3) change how a slide is shown.

Normal View
You create the presentation in this view.

Slide Sorter View
All the slides as mini slides. Change their order here.

Reading View
The slide as it is shown on the screen. Esc leaves it.

Slide Show
The slide on the full screen. F5 starts from slide 1.

8.7 The LibreOffice Impress work space

Start LibreOffice Impress: **Start → All Programs → LibreOffice 4.1 → LibreOffice Impress**. Many of its tools are also in LibreOffice Writer.

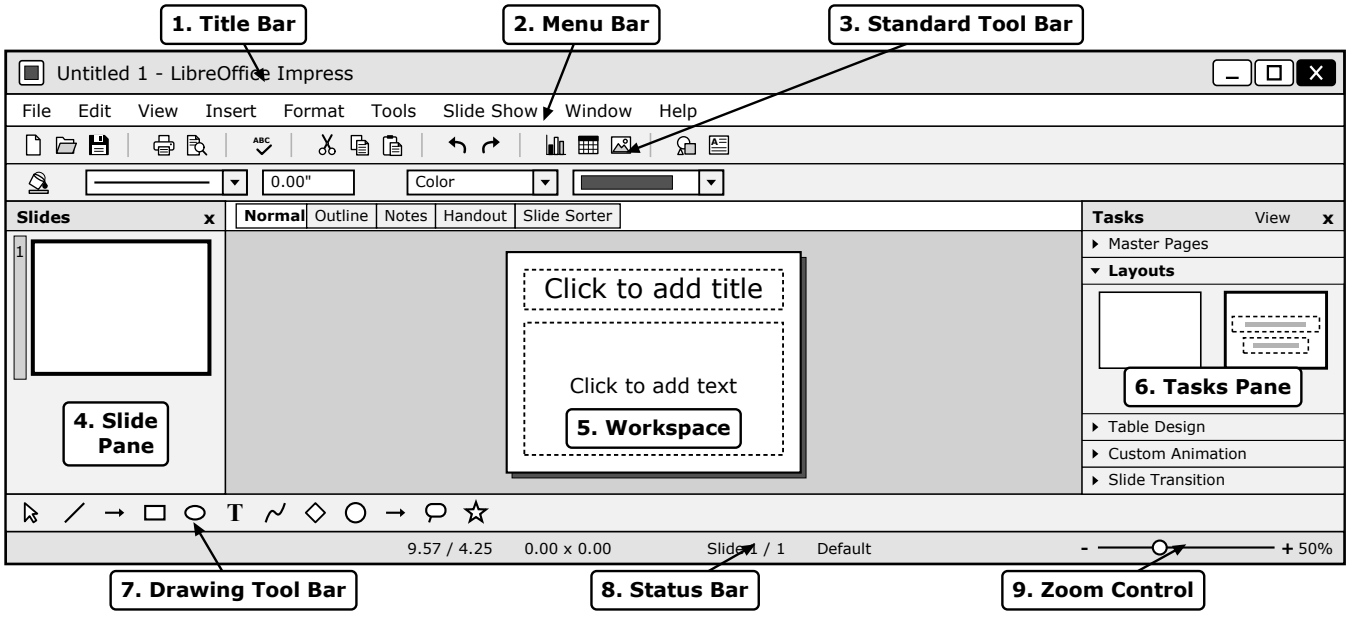

Figure 8.5.1 - the LibreOffice 4.1 Impress work space

- **Menu Bar:** Has all the commands needed to create the presentation.
- **Standard Tool Bar:** The menus of the menu bar as icons, for ease of operation.
- **Drawing Tool Bar:** The tools to make drawings on a slide.

The Title Bar, the Slide Pane, the Workspace, the Status Bar and the Zoom Control work as in PowerPoint. The Tasks Pane has **5 components**. They are not all open at the start: click a word to open it.

(i) THE TASKS PANE (FIGURE 8.5.2)

- **Master Pages:** the presentation and its style; a few default master pages.
- **Layouts:** layouts kept by the software; choose one and change it.
- **Table Design:** styles for creating tables.
- **Custom Animation:** add, change or remove animations.
- **Slide Transition:** how one slide changes to the next: speed, sound, automatic change.

(>) DO IT - PRACTICAL 2 (TEXTBOOK ACTIVITY, PAGE 249)

Meet the two programs. **Ask your teacher first.**

1	Start MS PowerPoint: Start → All Programs → Microsoft Office → Microsoft Office PowerPoint.
2	Find the 11 parts of the window (8.5). Try the four views. Press **F5**, then **Esc**.
3	Start LibreOffice Impress. Find its 9 parts and open each part of the Tasks Pane.
4	With your teacher, search the web for other presentation software and a few AI tools.

A Choose the correct answer

6 marks

Underline your answer.

1. Which presentation software is open source?
   (a) Apple Keynote (b) Microsoft PowerPoint
   (c) LibreOffice Impress (d) Corel Presentation

2. Which organization develops LibreOffice Impress?
   (a) Apple Inc. (b) Document Foundation
   (c) Corel Corporation (d) Microsoft Corporation

3. In MS PowerPoint, the tool bar with tabs, groups and icons is the
   (a) Menu Bar (b) Ribbon (c) Status Bar (d) Slide Pane

4. Which key starts the slide show from the first slide?
   (a) Esc (b) F1 (c) F5 (d) Enter

5. How many components does the Tasks Pane of LibreOffice Impress have?
   (a) 3 (b) 4 (c) 5 (d) 9

6. Which of these is an AI tool for creating presentations?
   (a) Gamma (b) Keynote (c) Impress (d) SkyDrive

B PowerPoint, Impress or both?

8 marks

Where do you find each part? Tick one box.

It is in ...	MS PowerPoint	LibreOffice Impress	Both
Ribbon	☐	☐	☐
Menu Bar	☐	☐	☐
Quick Access Tool Bar	☐	☐	☐
Standard Tool Bar	☐	☐	☐
Slide Pane	☐	☐	☐
Drawing Tool Bar	☐	☐	☐
Status Bar	☐	☐	☐
Zoom Control	☐	☐	☐

C Match them

6 marks

Write the correct letter in the box.

A - Part		B - What it does
1. Quick Access Tool Bar		**A.** Shows the slides in small size on the left.
2. Title Bar		**B.** Zooms the slide in or out.
3. Slide Pane		**C.** Runs commands faster; you can add the commands you use often.
4. Notes Pane		**D.** Shows the number of slides, the selected slide number and the language.
5. Status Bar		**E.** Shows the name of the presentation and of the software.
6. Zoom Control		**F.** Notes about a slide that the audience does not see.

D Which view?

6 marks

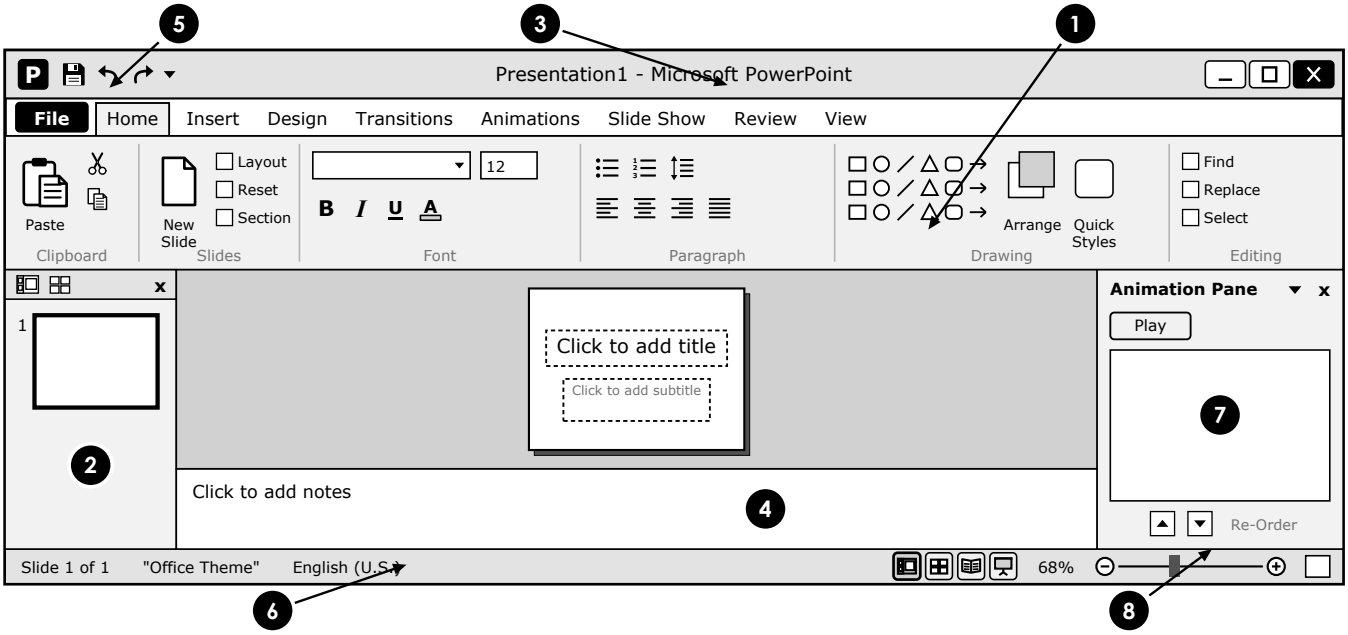

Tick the view you use.

You want to ...	Normal	Slide Sorter	Reading	Slide Show
create and edit a slide.	☐	☐	☐	☐
change the order of the slides.	☐	☐	☐	☐
show the presentation to the audience on the full screen.	☐	☐	☐	☐
see all the slides together as mini slides.	☐	☐	☐	☐
read the texts clearly, and leave with the Esc key.	☐	☐	☐	☐
start from the first slide with the F5 key.	☐	☐	☐	☐

E Label the PowerPoint window

8 marks

Write the name of each numbered part.

1. ..... 2. ..... 3. ..... 4. .....

5. ..... 6. ..... 7. ..... 8. .....

F Open source or proprietary?

5 marks

Write the organization and tick one box. Half a mark each.

Software	Developing organization	Open source	Proprietary
Apple Keynote		☐	☐
Corel Presentation		☐	☐
LibreOffice Impress		☐	☐
Microsoft PowerPoint		☐	☐
OpenOffice.org Impress		☐	☐

CHAPTER 3

Making a Presentation

? MY FIRST PRESENTATION

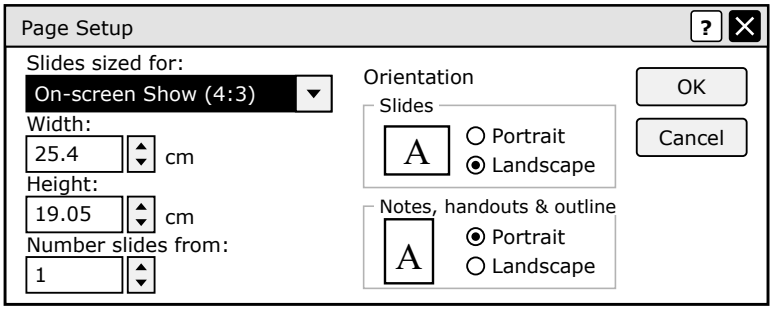

"I want to make slides about Sigiriya for History. Where do I start?" "Choose a size and a layout, type the title, add pictures - and save it!"

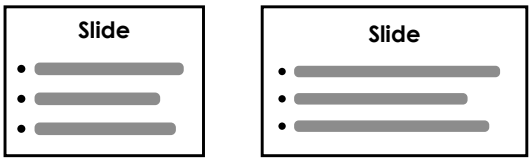

In this chapter you build a presentation step by step, with MS PowerPoint or LibreOffice Impress.

8.8 The slide size

Set the size of the slides to suit the theme: the type, the length and breadth, and the orientation. The size (the ratio of the length and the width) is **Standard (4:3)** or **Widescreen (16:9)**.

MS PowerPoint: **Design → Page Setup** LibreOffice Impress: **Format → Page**

Standard (4:3) **Widescreen (16:9)**

Figure 8.6.1 - the Page Setup window of MS PowerPoint

8.9 Slide layouts and themes

When you prepare a slide, choose a **slide layout** (also called a theme or template) and the slide size for the presentation.

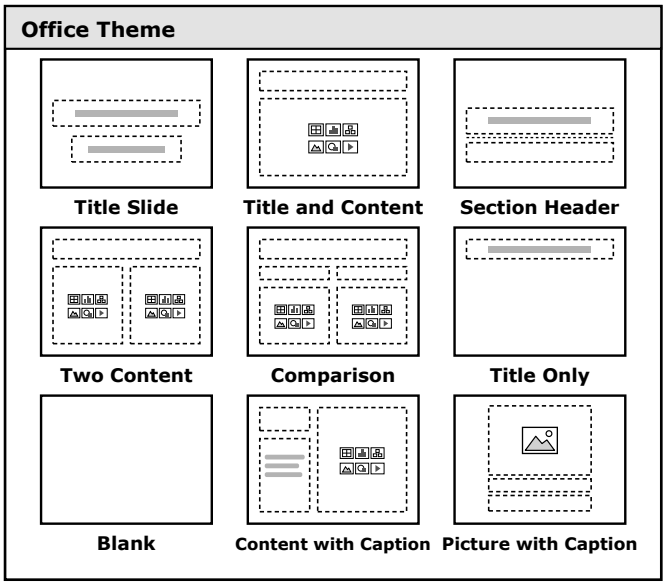

Figure 8.6.3 - the Office Theme

MS PowerPoint: **Home → New Slide or Layout → Office Theme**. Choose one of the layouts (Figure 8.6.3).

Reuse Slides uses the theme of a finished presentation to make a new one. For a theme that is not in the list, choose one from outside (**Slides from Outline**).

LibreOffice Impress: **Format → Slide Layout → Layout** (Figure 8.6.4), or **Master Pages** for a theme.

The first slide is usually the **Title Slide**: type a title and a sub-title.

8.10 Show, save and open

Figure 8.6.5 - the title slide of the textbook

View the slide show: Slide Show → From Beginning, or press **F5** (Impress: View → Start from first Slide). The slides fill the screen.

Save it in a secondary storage location, to open it whenever you need it: File → Save As → My Documents, type the name, Save.

Open it again: File → Open and select its name.

8.11 The slide background

The software offers user-friendly ways to add colours, shapes / objects and images / drawings to the slide background.

MS POWERPOINT

- Design → Background Styles: add a style to the background (Figure 8.6.6).
- **Format Background**: try other colours, shapes or pictures.

LIBREOFFICE IMPRESS

- Format → Page → Background: add colours (gradients) or shapes to the background (Figure 8.6.7).

8.12 Text, shapes, clip art and pictures

The box marked **Click to add title** is a **Place Holder**: click it and type. Where there is no place holder, use a **Text Box**. Make font changes as in MS Word or LibreOffice Writer.

Insert **objects** before or after typing: Shapes / Objects, Clip Art, Pictures (from the computer or from external sources), Smart Art and Charts. Drag the small **handles** at the corners to expand or shrink them (Figure 8.6.8).

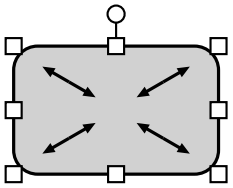

Figure 8.6.8 - the handles

MS POWERPOINT

- Insert → Text Box: type where there is no place holder.
- Insert → Shape: choose a shape and drag it on the slide.
- Right click a shape, **Format Shape**: its colours.
- Insert → Clip Art: search for a clip art by its name.
- Insert → Picture: choose the picture.

LIBREOFFICE IMPRESS

- View → ToolBars → Drawing: the Text tool and the shapes.
- View → Tool Bars → Line and Filling, Area Style/Filling: colour a shape.
- Tools → Gallery (or the Drawing Tool Bar): drag a clip art from the folders to the slide.
- Insert → Picture → From File, or Photo Album (Add, Insert slides).

DO IT - PRACTICAL 3 (TEXTBOOK ACTIVITY, PAGE 261)

Make **MyFirstPresentation**. Use MS PowerPoint or LibreOffice Impress.

1	Start a new presentation. Choose the **Title Slide** layout. Type the title **Let's make a presentation** and the sub-title **Let's give a name to it**.
2	Save it as **MyFirstPresentation** (File → Save As → My Documents, type the name, Save).
3	Open it again (File → Open). Add a slide background.
4	Add a slide with a shape, a clip art and a picture. Resize them with the handles. Save again.

A Complete the menu paths

8 marks

Write the menu path in each empty cell.

You want to ...	MS PowerPoint	LibreOffice Impress
Set the slide size		
Choose a layout or theme	Home → New Slide or Layout → Office Theme	
Start the slide show		View → Start from first Slide (or F5)
Add a slide background		
Insert clip art	Insert → Clip Art, search by name	
Insert a picture		Insert → Picture → From File

B Put the steps in order

6 marks

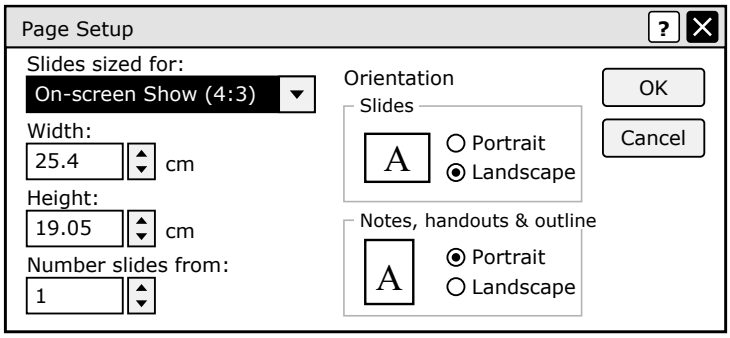

Number the steps 1 to 6 in the Order column.

Order	Step (make a title slide and save it)
	Click "Click to add subtitle" and type the sub-title.
	Start MS PowerPoint.
	Type the file name and click Save.
	Choose the Title Slide layout (Home, Layout).
	Click File, Save As and choose My Documents.
	Click "Click to add title" and type the title.

C Read the Page Setup window

7 marks

Write what the window shows.

1. Slides sized for: .....
2. Width: .....
3. Height: .....
4. Orientation of the slides: .....
5. Orientation of notes: .....

6. Show that the width and the height are in the ratio 4 : 3. (2 marks)

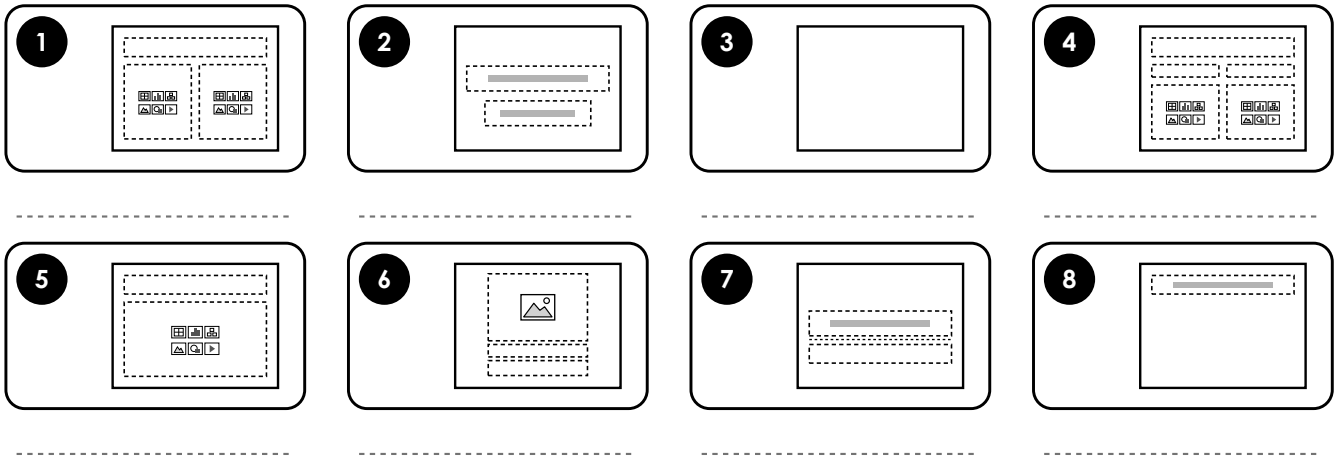

D Name the layouts

8 marks

Write the name of each Office Theme layout. One name is extra.

LAYOUT NAMES

Title Slide	Title and Content	Section Header
Two Content	Comparison	Title Only
Blank	Content with Caption	Picture with Caption

E Fill in the blanks

8 marks

Use the words in the box. Two words are extra.

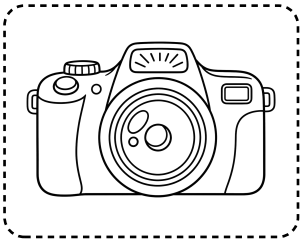

WORD BANK

Widescreen	Page Setup	Place Holder	Text Box	Reuse
handles	Gallery	Album	Landscape	Notes Pane

1. A slide size is Standard (4:3) or ..... (16:9).
2. In MS PowerPoint, the slide size is set with Design, ...
3. The box "Click to add title" is called a ..... .
4. Where there is no place holder, insert a ..... .
5. ..... Slides uses the theme of a finished presentation.
6. Drag the small ..... at the corners to resize a shape.
7. In LibreOffice Impress, ready-made clip art is in the ..... .
8. Insert, Picture, Photo ..... adds pictures in Impress.

"Every great presentation starts with one empty slide and one good idea."

- THE KING OF ICT

Colour me!

CHAPTER 4

Transitions, Animations, Media and Printing

? BRING YOUR SLIDES TO LIFE

"My slides are ready, but they look boring." "Add transitions, animations and a video - only one on each slide!"

In this chapter you add effects, sounds and videos, print handouts for the audience, and make a presentation on green computing.

8.13 Slide transitions

A **slide transition** is the way one slide changes to the next. There are many alternatives, and you can add the speed, sound effects and an automatic change.

MS POWERPOINT

- The **Transition** tab (Transition to This Slide): choose a style for each slide.
- Transition → Effect Options: the direction of the effect.
- Transition → Sound: a sound effect. **Apply to All Slides**: the same for every slide.

LIBREOFFICE IMPRESS

- Tasks Pane, **Slide Transition**: Apply to Selected Slide.
- **Modify Transition**: Speed, Sound, and Advanced Slide - On mouse Click or Automatically After.
- **Apply to All Slides**: one style for the whole e-presentation.

8.14 Animations

We can apply **animation** to texts, shapes, drawings, pictures or any other object on a slide. Select the object first.

MS POWERPOINT

- Animation → (Animation): choose an effect.
- Animation → (Timing): Start, Duration, Delay (Figure 8.6.10).
- Animation → (Advanced Animation) → Animation Pane: change or delete animations.

LIBREOFFICE IMPRESS

- Tasks Pane, **Custom Animation**.
- Custom Animation → Modify effect → Add: Entrance, Emphasis, Exit, Motion Paths, Misc Effects (Figure 8.6.11).
- **Change** or **Remove** changes or deletes an effect.

"Move your slides with care. Too many effects hide your message."

- THE KING OF ICT

Figure 8.6.10 - Animation timing (PowerPoint)

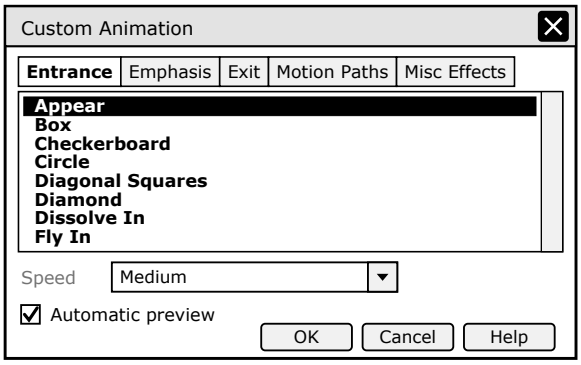

Figure 8.6.11 - Custom Animation (Impress)

8.15 Sounds and videos

We can insert a sound file or a video clip into a presentation.

	MS PowerPoint	LibreOffice Impress
Sounds	Insert → Media → Audio: **Media from File** (a file from the computer or from outside), **Clip Art Audio**, **Record Audio** (sounds from a microphone - click the button with the brown dot).	Insert → Movie and Sound: select the sound clip and add an animation to it. Sounds recorded with a microphone can be inserted too.
Videos	Insert → Media → Video: **Video from File**, **Video from Web Site** (from the internet), **Clip Art Video**.	Insert → Movie and Sound: open the video clip, enlarge it to the size you need and apply an animation to it.

8.16 Printing and handouts

File → Print sends a command to the printer. In the print window you choose:

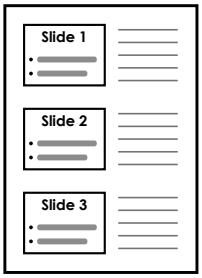

MS POWERPOINT

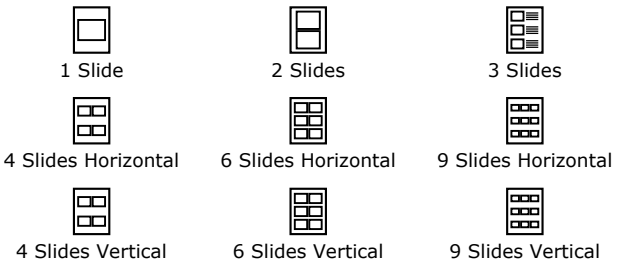

- **Printer:** a printer connected to the computer.
- **Settings:** all slides, the selected slides, or slides by their numbers.
- The size of the print on the paper.

LIBREOFFICE IMPRESS

- **General, Printer:** select the printer.
- **Range and copies:** all slides, selected slides or slide numbers; the number of copies.
- **Print** (Document): customised print outs.

A presentation can be projected and also printed as a **handout**. The audience gets a printed copy and can note down important notes beside the slides (Figure 8.6.14).

"Use computers wisely: save paper, save power, save our planet."

- THE KING OF ICT

8.17 Green computing

Green computing is the study and practice of designing, manufacturing, using and disposing of computers, servers and associated subsystems - such as monitors, printers, storage devices, and networking and communications systems - efficiently and effectively with minimal or no impact on the environment.

It covers **green use**, **green disposal**, **green design** and **green manufacturing**, and follows the core principles of sustainability: **reduce, reuse and recycle**.

★ TEXTBOOK ACTIVITY (PAGE 267): A PRESENTATION ON GREEN COMPUTING

Find out more in books, magazines and on the web. With your teacher, make a presentation with these **seven points**: a suitable title with animation, images, a video clip, a sound clip, a menu to help the user, buttons for slide transition and a conclusion slide on Green Computing.

> DO IT - PRACTICAL 4 (TEXTBOOK ACTIVITIES, PAGES 261 - 267)

Media, effects, handouts and a presentation on Green Computing. **Ask your teacher first.**

1	Open MyFirstPresentation. Add two slides: a video clip on one, an audio clip on the other (Insert, Media).
2	Give each slide a transition. Add a custom animation and set Start, Duration and Delay. Press **F5**.
3	Print it as a handout with 3 slides on a page (File → Print). Ask your teacher first.
4	Make a presentation on Green Computing with the seven points of 8.17.
5	Check every slide with the rules of 8.3, then present it to your class.

A Which option?

6 marks

Write the option you use. One option is extra.

OPTIONS

Media from File	Clip Art Audio	Record Audio	Video from File
Video from Web Site	Clip Art Video	Movie and Sound	

You want to ...	Option
add a sound file that is saved on the computer (PowerPoint)	
save your own voice from a microphone (PowerPoint)	
add a ready-made sound from the clip art (PowerPoint)	
add a video file from the computer (PowerPoint)	
add a video from the internet (PowerPoint)	
add a sound or a video clip in LibreOffice Impress	

B Handouts

4 marks

Look at 8.16 and Figure 8.6.14.

1. Which menu path prints handouts?

2. How many slides are printed on one page with "6 Slides Horizontal"?

3. Which handout gives lines to write notes beside the slides?

4. Why are handouts given to the audience?

C Plan a presentation

8 marks

Plan four slides on Green Computing (page 267). Draw and write in each slide.

Title of my presentation:

Slide 1: Title	Slide 2	Slide 3	Slide 4: Conclusion

D Choose the correct answer

5 marks

Underline your answer.

1. In MS PowerPoint, slide transitions are under the
   (a) Design tab (b) Transition tab (c) Insert tab (d) View tab

2. Which is NOT a tab of the Custom Animation window?
   (a) Entrance (b) Emphasis (c) Exit (d) Reuse

3. In LibreOffice Impress, a sound clip is inserted with Insert,
   (a) Movie and Sound (b) Picture
   (c) Gallery (d) Text Box

4. "Automatically After" means that the slide changes
   (a) without a click (b) with a sound (c) when printed (d) in Slide Sorter

5. The principles of sustainability in green computing are
   (a) reduce, reuse, recycle (b) cut, copy, paste
   (c) open, save, close (d) start, delay, duration

E Transition or animation?

8 marks

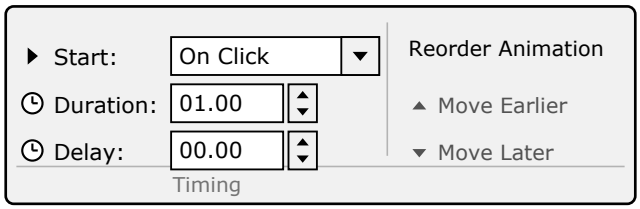

Tick one box for each line.

It is about ...	Transition	Animation
The effect when you move from one slide to the next.	☐	☐
A picture flies in on a slide.	☐	☐
Apply to All Slides gives every slide change the same effect.	☐	☐
Entrance, Emphasis, Exit and Motion Paths.	☐	☐
Modify Transition → Speed	☐	☐
Start: On Click, Duration: 01.00, Delay: 00.00	☐	☐
Advanced Slide: On mouse Click or Automatically After	☐	☐
Custom Animation → Modify effect → Add	☐	☐

F Read the animation timing

4 marks

Look at the Timing group of MS PowerPoint.

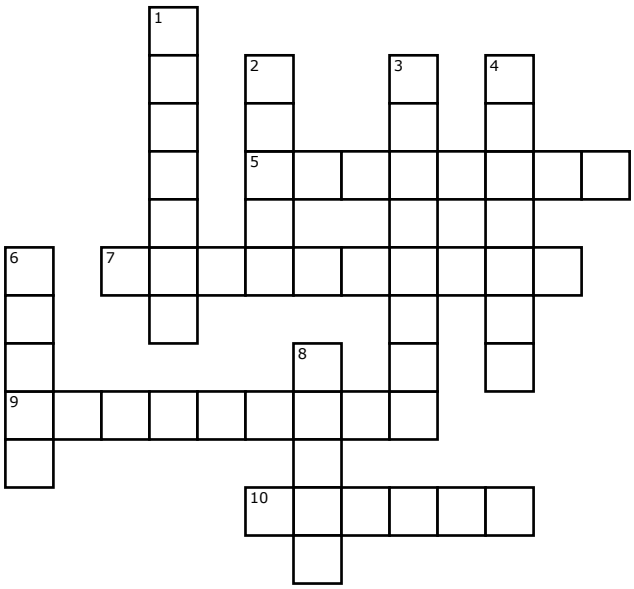

1. It starts: .....
2. Duration: .....
3. Delay: .....
4. Buttons that change the order: .....

G Crossword

10 marks

All the words are in this unit. Write one letter in each square.

ACROSS

5. Custom Animation tab for effects that bring an object in (8)
7. The effect when one slide changes to the next (10)
9. Movement given to a text, a shape or a picture (9)
10. ... Audio saves sounds from a microphone (6)

DOWN

1. Ready-made clip art in LibreOffice Impress (7)
2. ... computing protects the environment (5)
3. Timing: how long an animation takes (8)
4. A printed copy of the slides for the audience (7)
6. Timing: the time to wait before an animation starts (5)
8. Insert, Media, ... from Web Site (5)

REVISION

Unit 8 in One Page

Read this the night before the test

Topic	The key facts
Presentation	Explaining or showing information to an audience in an organised way. A presentation is a collection of slides.
Projectors	OHP: transparent sheets, rare now. Slide projector: slides with images. Multimedia projector: a computer or flash memory; very popular.
Multimedia	Numbers, letters, images, animations, videos, tables, graphs, sounds.
A good presentation	6 - 9 lines; 32 points or more; correct grammar; not more than two images; good colours; one video; target group; format; sharing.
Software	Open source: LibreOffice Impress, OpenOffice.org Impress. Proprietary: MS PowerPoint, Apple Keynote, Corel Presentation.
PowerPoint window	Quick Access Tool Bar, Title Bar, Tabs, Ribbon, Slide Pane, Workspace, Task Pane, Notes Pane, Status Bar, View Tab, Zoom Control.
Impress window	Title Bar, Menu Bar, Standard Tool Bar, Slide Pane, Workspace, Tasks Pane, Drawing Tool Bar, Status Bar, Zoom Control.
Views	Normal (create), Slide Sorter (change the order), Reading (Esc to leave), Slide Show (F5).
Slide size	Standard (4:3) or Widescreen (16:9): Design → Page Setup / Format → Page.
Layouts	Title Slide, Title and Content, Two Content, Blank ...: Home → Layout / Format → Slide Layout.
Text and objects	A Place Holder or a Text Box; shapes, clip art, pictures, Smart Art, charts; drag the handles to resize.
Effects	Transition: between two slides. Animation: on an object (Start, Duration, Delay; Entrance, Emphasis, Exit).
Media	Insert → Media → Audio or Video; Impress: Insert → Movie and Sound.
Save, open, print	File → Save As; File → Open; File → Print - slides or handouts.

TICK WHEN YOU CAN DO IT

- [ ] I can explain what a presentation is and compare the three projectors.
- [ ] I can list the characteristics of a good quality presentation.
- [ ] I can name open source and proprietary presentation software.
- [ ] I can name the parts of the PowerPoint and Impress windows and use the four views.
- [ ] I can set the slide size, choose a layout and add text, shapes and pictures.
- [ ] I can add transitions, animations, sounds and videos.
- [ ] I can save, open, show and print a presentation and its handouts.

WORD POWER

Unit 8 Word List

Twenty-six words you must know

Word	What it means
Presentation	Explaining or showing information to an audience in an organised way.
Audience	The people who watch and listen to a presentation.
Slide	One page of a presentation. A presentation is a collection of slides.
Multimedia	Numbers, letters, images, animations, videos, tables, graphs and sounds together.
OHP	Over Head Projector. It shows writing or printed material on transparent sheets.
Multimedia projector	It shows the contents of a computer or a flash memory: pictures, videos, animations.
Presentation software	Software that helps to create presentations with multimedia contents.
Open source	Free software, e.g. LibreOffice Impress.
Proprietary	Commercial software, e.g. Microsoft PowerPoint.
Ribbon / Tabs	The tool bar of MS PowerPoint, with its menus (tabs) and groups of icons.
Slide Pane	The pane on the left that shows the slides in small size.
Notes Pane	Notes about a slide. The audience does not see them.
Task Pane	A pane that helps to add features, such as animations (Tasks Pane in Impress).
Status Bar	It shows the number of slides, the selected slide number and the language.
Slide Sorter View	All the slides as mini slides; you can change their order.
Slide Show	The presentation on the full screen for the audience (F5).
Layout	The place holders of a slide, e.g. Title Slide, Two Content.
Theme	A ready-made design for the slides (Office Theme, Master Pages).
Place Holder	A box like "Click to add title": click it and type.
Text Box	A box to type text where there is no place holder.
Clip Art / Gallery	Ready-made pictures in the presentation software.
Handles	The small squares at the corners of a shape: drag them to resize it.
Transition	The effect when one slide changes to the next one.
Animation	An effect given to a text, shape, picture or other object on a slide.
Handout	A printed copy of the slides for the audience, with space for notes.
Green computing	Using computers with minimal or no impact on the environment.

"Learn the words today, and you will speak like an expert tomorrow."
